PROJECTS AND INTERSHIPS

Participated in a competition for 6th GKDC event under ISNEE (Indian Society of new era engineers) Motorsports

The project is about fabricating a Go-kart totally and submitting it as a complete working model. We worked with a team of 25 members and it is divided into 5 different teams. I have been a part of "Chasis and engine transmission" team and completed the project and participated in the competition and we secured 9th place in the national level event at BIC track Delhi.

September 2018-February-2019

3D printing; Additive manufacturing from Vero clear material using Multi jet 260 Technology. (Final Year Project)

The aim of this project is to determine the innovation risk for an additive manufacturing process. Current multi jet technology systems for additive manufacturing (AM) have an ability to create geometry design features, multi and complex material and the morphologies with built layer thickness in the order of tens of microns. Recent technologies have been the use to become far more widespread and it offers to create the exciting possibilities for the future development of the additive manufacturing process.

January 2019-March-2019

Internship

Undergone a 10 day internship at "UNICAST ALLOYS PRIVATE LIMITED, COIMBATORE" in the production department and studied about the working of CNC and VMC machines and the process ongoing.
